DETAILED ACTION

This is in response to amendment filed 4/18/05 in which claims 1-65 are pending. The applicant's amendments have been fully considered therefore this case is in condition for allowance.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior arts of record fail to anticipate or render obvious the following recited features: de-quantizing the quantized intermediate form of the Farey-sampled data prior to reconstructing the data; and reconstructing the intermediate form of the Farey-sampled data in order to obtain reconstructed data for use as recited in claim 1. Sampling the input data at the points of Farey quadrature; transforming the Farey-sampled data to a second form as recited in claim 34. Filter that receives an input signal and outputs a transformed signal, the digital filter being an arithmetic wavelet filter in which the arithmetic wavelets are defined in accordance with the following expressions as recited in claims 50-52. Transforming the intermediate form of the data using an intermediate inverse transform to obtain output values at the points of Farey quadrature as recited in claim 53.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
